DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
2. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Regarding Claims 1-30, it is unclear whether the list of specific definitions of terms, provided in the Specification at paragraphs 22-31, defines claim terminology, or do these definitions not limit the claim terminology?
5. Regarding Claims 1 and 15, it is unclear whether the described structure involving a support, a metal layer, and a protective layer necessarily requires that the "extensible metal or metal alloy layer" is sandwiched by the support and protective layer or whether the three layers may be arranged having any one layer between the other two.
6. Regarding Claims 2, 16, and 30, it is unclear how the metal layers can be other than substantially continuous in view of the extensibility definition which precludes discontinuities. Hence, it is unclear what is contemplated as being required for substantial continuity that is not already required in the respective independent claims.
7. Regarding Claim 5, it is unclear whether the claimed two layers describe layers in addition to the "extensible metal or metal alloy layer" or whether the claimed two

layers may or may not be "extensible metal or metal alloy layer." An analogous rejection applies to Claim 19.

8. Regarding Claims 10-14 and 24-28, it is unclear what is meant by the phrase "an electromagnetic shielding capability that is retained." Does this claimed retention require no diminution in capability or merely some finite amount of capability?
